Survey Flow Diagram — Template

Fillable PDF. Click a blue box to type; tick the small squares. Save with **File › Save** and attach the saved PDF to your assignment. Works best in the free Adobe Acrobat Reader; macOS Preview and web browsers also work. If an answer does not fit its box, continue it on an extra page. Source: `Step_04_Study_Architecture_and_Experimental_Design/design_docs/survey_flow_diagram.md` (rebuild with `tools/make_fillable_pdfs.py`).

Sketch your survey administration flow here using the Mermaid diagram below, then export as an image for your pre-registration and manuscript supplement.

> **Instructions:** Edit the Mermaid block to match your study. Render with any Markdown previewer that supports Mermaid (VS Code with Mermaid extension, Obsidian, GitHub, etc.).

Generic BACI Flow (edit to match your study)

```
flowchart TD
    A([Participant recruited]) --> B[Eligibility screener]
    B -- Ineligible --> X([Exit])
    B -- Eligible --> C[Informed consent]
    C --> D[Baseline survey — T0\nDemographics + focal constructs]
    D --> E{Random assignment}
    E -- Control --> F[Control condition\ne.g., unrelated video / waitlist]
    E -- Treatment --> G[Stimulus / Intervention\ne.g., documentary / workshop / game]
    F --> H[Immediate post-survey — T1\nFocal constructs + manipulation check]
    G --> H
    H --> I{Follow-up planned?}
    I -- Yes --> J[Delayed follow-up — T2\nFocal constructs + retention check]
    I -- No --> K([Study ends — debrief])
    J --> K
```

Your version of this flow (list each step and arrow, or sketch it and attach the image):

Notes on Flow Design

Decision point	Your choice	Rationale
Is the baseline survey separated from the stimulus by > 24 h?	☐ Yes ☐ No	Reduces demand characteristics
Is the condition assignment hidden from participants?	☐ Yes ☐ No	
Are attention checks embedded? Where?		
Are manipulation checks embedded? Where?		

Decision point	Your choice	Rationale
Is there a debriefing page?	☐ Yes ☐ No	Required if deception used
What platform delivers the survey?		
What platform delivers the stimulus (if online)?		

Attrition Tracking

Wave	Invited	Started	Completed	Drop-off rate
T0 Baseline				
T1 Post				
T2 Follow-up				

Expected attrition rate (from literature or pilot): _____ %

Baseline oversampling multiplier applied: _____ × target N

(See `../Step_09_Power_and_Sampling/` for calculations)
