Temporal Context Log

Fillable PDF. Click a blue box to type; tick the small squares. Save with **File › Save** and attach the saved PDF to your assignment. Works best in the free Adobe Acrobat Reader; macOS Preview and web browsers also work. If an answer does not fit its box, continue it on an extra page. Source: `Step_04_Study_Architecture_and_Experimental_Design/temporal_context_log.md` (rebuild with `tools/make_fillable_pdfs.py`).

Record temporal and environmental covariates for **every data collection wave**. These factors can confound wildlife attitude and behavior measures and must be available for analysis and reporting (see `study_design_checklist.md` §4).

Study Metadata

Field	Entry
Study title	
Principal investigator	
Study site(s)	
Focal taxon / taxa	
Pre-registration ID	

Wave Log

Copy the block below for each data collection wave (T0, T1, T2, ...).

Wave: (e.g., T0 — Baseline)

Dates of data collection: to

1. Phenological / Seasonal Context

Variable	Entry
Season (N. Hemisphere)	☐ Winter ☐ Spring ☐ Summer ☐ Autumn
Relevant phenological event (tick ✓ all that apply)	☐ Hunting / trapping season open ☐ Hunting season closed ☐ Breeding / nesting season ☐ Migration peak ☐ Post-harvest / livestock gathering ☐ None notable
Notes on phenological context	

2. Local Conflict or Management Events

Variable	Entry
Any depredation incidents reported in study area during this wave?	☐ Yes ☐ No ☐ Unknown
If yes: number of incidents, date range, species involved	
Any management actions (cull, translocation, relisting, quota change)?	☐ Yes ☐ No ☐ Unknown

Variable	Entry
If yes: describe	
Any rewilding, reintroduction, or conservation program launch?	☐ Yes ☐ No
Notes	

3. Media Salience

Variable	Entry
Major news stories involving focal taxon during wave?	☐ Yes ☐ No
If yes: headline summary and date	
Google Trends index for focal taxon (optional, 0–100)	
Social media spike observed?	☐ Yes ☐ No
Notes	

4. Weather (aggregate over data collection window)

Variable	Entry
Mean temperature (°C or °F, specify)	
Precipitation (mm or qualitative: dry / normal / wet)	
Extreme weather events? (heat wave, drought, flooding)	☐ Yes ☐ No — describe if yes:
Data source (e.g., NOAA, local station, ECMWF)	

5. Socio-political Context

Variable	Entry
Recent election or major policy vote?	☐ Yes ☐ No — describe if yes:
Active social movement relevant to study topic?	☐ Yes ☐ No
Notes	

6. Sample Characteristics This Wave

Variable	Entry
N invited	
N completed	
Response rate (%)	

Variable	Entry
Known differences from prior wave (if applicable)	
Attrition characteristics (if repeated measures)	

7. Analyst Notes

Free text — any additional contextual observations that may be relevant during analysis.

Covariate Coding Guide (for analysis)

When these variables enter regression models or are used as covariates:

Variable	Suggested coding
Season	Dummy (ref = winter) or cyclical (sine/cosine of day-of-year)
Hunting season open	Binary 0/1
Recent depredation	Binary 0/1, or count of incidents within 30-day window
Media salience	Google Trends index (continuous) or binary spike
Wave	Numeric or dummy
Days since stimulus	Continuous (for decay modeling)
