Pre-registration Template

Fillable PDF. Click a blue box to type; tick the small squares. Save with **File › Save** and attach the saved PDF to your assignment. Works best in the free Adobe Acrobat Reader; macOS Preview and web browsers also work. If an answer does not fit its box, continue it on an extra page. Source: `Step_05_Preregistration_and_Open_Science/preregistration_template.md` (rebuild with `tools/make_fillable_pdfs.py`).

Complete every section **before** data collection begins. Submit this document to OSF or AsPredicted to obtain a time-stamp. Do not alter the document after submission; use a numbered amendment if the protocol changes.

Cross-platform note: If submitting to **AsPredicted (v2.00)**, each section below is cross-referenced with the corresponding AsPredicted question number `[AP: Q#]`. Use `aspredicted_template.md` for the short-form version.

---

1. Administrative information `[AP: Q9, Q10, Q11]`

Field	Entry
Title	
Authors	
Corresponding author email	
OSF / AsPredicted URL (after submission)	
Date submitted `[AP: Q1 — must be before data collection]`	
Date data collection begins	
Expected date data collection ends	

---

2. Research questions and hypotheses `[AP: Q2]`

2.1 Research questions

List each research question (RQ) separately. Be specific about the population, construct, and context.

- RQ1:
- RQ2:

2.2 Confirmatory hypotheses

State each hypothesis in directional form where possible (H1a, H1b, ...). Each hypothesis must map to a specific statistical test in Section 6.

- H1:
- H2:

2.3 Exploratory questions (optional)

List questions you intend to explore but for which no directional prediction is made. These do not need directional form.

- EQ1:

---

3. Theoretical and empirical basis

Briefly justify each confirmatory hypothesis with reference to theory (Step 02) and prior empirical work. 1–3 sentences per hypothesis.

---

4. Study design [AP: Q4, Q10, Q11]

Field	Entry
Design type	*(e.g., cross-sectional survey, longitudinal panel, experiment)*
Unit of analysis	*(individual, household, community, ...)*
Target population	
Sampling strategy	*(see Step 09)*
Recruitment method	
Survey platform	
Randomization (if any)	*(see* `Step_04_Study_Design/design_docs/randomization_plan.md`*)*

---

5. Measures [AP: Q3]

5.1 Primary outcomes

For each outcome: variable name, scale / response options, and which hypothesis it maps to.

Variable	Scale / response options	Maps to hypothesis

Need more rows? Add a continuation page or attach a spreadsheet with the same columns.

5.2 Secondary outcomes

Variable	Scale / response options	Purpose

Need more rows? Add a continuation page or attach a spreadsheet with the same columns.

5.3 Covariates and moderators

Variable	Role (covariate / moderator)	Justification

Need more rows? Add a continuation page or attach a spreadsheet with the same columns.

5.4 Manipulation checks (if experimental)

---

6. Sampling plan [AP: Q7]

Field	Entry
Target N	*(from power analysis — see* Step_09_Power_and_Sampling/*)*
Minimum acceptable N	
Stopping rule	*(e.g., fixed N, sequential, quota)*
Oversampling / stratification	

---

7. Exclusion and inclusion criteria [AP: Q6]

Specify criteria applied at the participant level and at the response level (e.g., attention checks, completion rate, outlier rules). These rules must be defined before seeing the data.

- Inclusion:
- Exclusion (participant-level):
- Exclusion (response-level / data-cleaning):

---

8. Confirmatory analysis plan [AP: Q5]

Every test listed here is confirmatory. Any analysis not listed here, or any analysis decided upon after data collection, is exploratory and must be reported as such.

8.1 Primary analyses

Hypothesis	Statistical test	Software / package	Alpha level	Multiple comparison correction
H1			.05	
H2			.05	

8.2 Planned covariates in primary models

8.3 Assumption checks

List how you will check (and, if violated, address) key assumptions before running primary tests.

8.4 Pre-specified contingency analyses

*If a primary measure fails (e.g., low reliability, floor/ceiling effect), specify the fallback analysis here. Pre-specified contingencies retain **confirmatory** status.*

Trigger condition	Contingency action

Need more rows? Add a continuation page or attach a spreadsheet with the same columns.

---

9. Exploratory analysis plan (optional) [AP: Q8]

List exploratory analyses you anticipate running. Label clearly as exploratory. Results will be reported in a separate "Exploratory findings" section of the manuscript.

- EA1:
- EA2:

---

10. Open science materials

Item	Status	Repository link
Survey instrument	☐ will share / ☐ embargoed	

Item	Status	Repository link
Analysis scripts	☐ will share / ☐ embargoed	
Raw data	☐ will share / ☐ embargoed	
Codebook	☐ will share / ☐ embargoed	

---

11. Amendments log

Record any deviations from this preregistration after submission. Each amendment must be time-stamped.

Date	Section changed	Nature of change	Reason

Need more rows? Add a continuation page or attach a spreadsheet with the same columns.
